Mobile: +1 (413) 404-9495
Homepage: <https://people.cs.umass.edu/lyang/>
Last Updated: 03/01/2018

Research Interests

Information retrieval, natural language processing, data mining and machine learning, with an emphasis on text mining, deep learning, ranking and relevance, question answering and probabilistic graphical models

Education

University of Massachusetts Amherst

Ph.D. in Computer Science

Advisor: Prof. W. Bruce Croft, ACM Fellow

AMHERST, MA, USA

Aug. 2014 - Present

University of Massachusetts Amherst

M.S. in Computer Science (GPA: 3.919/4)

Advisor: Prof. W. Bruce Croft, ACM Fellow

AMHERST, MA, USA

Aug. 2014 - Feb. 2017

Singapore Management University

Visiting Graduate Student in Computer Science

Advisor: Prof. Jing Jiang and Prof. Feida Zhu

SINGAPORE, SINGAPORE

Sep. 2012 - Jun. 2014

Peking University

M.E. in Software Engineering

Advisor: Prof. Zhong Chen

BEIJING, P.R.CHINA

Sep. 2011 - Jul. 2014

Northeastern University

B.E. in Software Engineering (Ranking: 1st of 337)

SHENYANG, P.R.CHINA

Sep. 2007 - Jul. 2011

Internship Experience

Microsoft Research Redmond

REDMOND, SEATTLE AREA, USA

Research Intern

Jun. 2016 - Sept. 2016

Mentors: Dr. Susan Dumais (ACM Fellow), Dr. Paul Bennett, Dr. Ahmed Hassan Awadallah from MSR
Characterize and predict user email reply behavior, Data Mining and Machine Learning; User Behavior Analysis and User Modeling; Classification; Feature Extraction and Analysis

I worked on a project on characterizing and predicting user email reply behavior. The main task is to characterize factors affecting email replies and build models to predict user reply behavior including reply action/ reply time in enterprise emails. A research paper based on this project is published as a full oral paper in SIGIR'17.

Microsoft Research Redmond/Bing

BELLEVUE, SEATTLE AREA, USA

Research Intern

May. 2015 - Aug. 2015

Mentors: Dr. Kieran McDonald, Dr. Qi Guo, Dr. Sha Meng from Bing and Dr. Yang Song, Dr. Milad Shokouhi from MSR

Learning to rank for proactive ranking, Cosmos/SCOPE for machine learning with Big Data; Data Mining and Search Ranking; Mining user interests/user modeling from search/browse logs

I worked on modeling user interests for proactive ranking of information cards of Microsoft Cortana. The main task is feature design and extraction from user behavior in search/browse logs to improve proactive ranking performance. Experiments performed with product data from a large commercial proactive search system show that the proposed method significantly outperforms the method deployed in the product. A research paper based on this project is published as a full oral paper in ECIR'16.

Baidu Inc.

BEIJING, P.R.CHINA

Software Engineer Intern

Feb. 2011 - Aug. 2011

Mentors: R&D Manager Jianguo Liu and Senior Software Engineer Tianlong Zhang

APP Inner Search Module of Baidu Search Engine, Linux, PHP, MySQL, JavaScript

I developed the application inner search module of Baidu search engine. Main features include directly showing videos, music, web applications in the search results of Baidu. I also participated in the development of MIS system for the Baidu Open Platform. The URL for this service is app.baidu.com.

Research Experience

Center for Intelligent Information Retrieval, UMass Amherst

AMHERST, USA

Research Assistant

Aug. 2014 - Present

Advisor: Prof. W. Bruce Croft

I am working with Prof. W. Bruce Croft on information retrieval, question answering and machine learning. I am also working closely with Prof. Jiafeng Guo on deep neural network models for question answering. We proposed an attention based neural matching model (aNMM) for ranking short answer text. aNMM adopts value-shared weighting scheme instead of position-shared weighting scheme for combining different matching signals and incorporates question term importance learning using question attention network. The paper on aNMM model is published in **CIKM'16** (Full Oral Paper). The implementation of aNMM using TensorFlow/Python is open sourced in [MatchZoo Toolkit](#).

Institute of Computing Technology, Chinese Academy of Science

BEIJING, CHINA

Visiting PhD Student

Sep. 2017 - Nov. 2017

Advisor: Prof. Jiafeng Guo

I am working with Prof. Jiafeng Guo on deep learning, question answering, neural conversational models. More project details will be published in a full conference paper. I am also developing the [MatchZoo Toolkit](#) with joint efforts of Prof. Guo's students. The [MatchZoo Toolkit](#) was developed with a focus on facilitating the designing, comparing and sharing of deep text matching models. There are a number of deep text matching models implemented, such as DRMM, MatchPyramid, MV-LSTM, aNMM, DUET, ARC-I, ARC-II, DSSM, and CDSSM.

Research Center, Singapore Management University

SINGAPORE, SINGAPORE

Research Assistant

Feb. 2013 - Aug. 2013

Advisor: Prof. Jing Jiang and Prof. Feida Zhu

Jointly Model Topics and Expertise in Community Question Answering, Probabilistic Graphical Model, Gaussian Mixture Model, Link Analysis, Research Project.

We proposed a probabilistic generative model TEM with GMM hybrid to jointly model topics and expertise of CQA users. Based on TEM results, we proposed CQARank algorithm to combine textual content learning results and link structure analysis to enforce topic expertise learning. We published a paper in **CIKM'13** (Full Oral Paper, [Top 3 Cited Papers in CIKM 2013](#)).

Honors and Awards

SIGIR Student Travel Award , CIKM 2013, ECIR 2016, CIKM 2016, SIGIR 2017 Awarded to selected student authors ACM SIGIR, ACM SIGWEB, Facebook, etc.	2013-2017
Best Paper Award Runner-ups Awarded to the best five papers SocInfo 2013	2013
National Scholarship Top 1% in over 12,000 students Ministry of Education, P.R.China	2010
IBM Excellent Student Scholarship Awarded to only 75 undergraduates and postgraduates all over China IBM	2010
International Mathematical Contest in Modelling(MCM) Honorable Mention COMAP, SIAM and MAA, USA	2010
Chinese Undergraduate Mathematical Contest in Modelling(CUMCM) National Second Prize CSIAM and Department of Higher Education, MoE, P.R.China	2009
ACM-ICPC Programming Contest Second Prize Northeastern University	2011
Top 10 Undergraduates of Liaoning Province Top 10 in over 100,000 students Department of Education of Liaoning Province	2011

Selected Open Source Projects

- **MatchZoo**: MatchZoo is a toolkit for deep neural text matching, with model implementations include ARC-I/ARC-II, DSSM, CDSSM, MatchPyramid, DRMM, aNMM, MV-LSTM, DUET, etc using TensorFlow.
 - **LDAGibbsSampling**: LDAGibbsSampling is an open source package for Gibbs sampling inference of LDA model, which could be used for topic modeling in text mining.
-

Professional Activities

- PC Member, The 24rd SIGKDD Conference on Knowledge Discovery and Data Mining (KDD 2018)
 - PC Member, The 56th Annual Meeting of the Association for Computational Linguistics (ACL 2018)
 - PC Member, Full Paper Track, The 4th ACM International Conference on the Theory of Information Retrieval (ICTIR 2018)
 - Reviewer, The 40th European Conference on Information Retrieval (ECIR 2018), 2018.
 - PC Member, Demo Track, The 11th ACM International Conference on Web Search and Data Mining (WSDM 2018), 2018
 - Reviewer, The 26th international World Wide Web Conference (WWW 2017), 2017.
 - PC Member, The 26th ACM International Conference on Information and Knowledge Management (CIKM 2017), 2017.
 - PC Member, Machine Learning Track, The 3rd ACM International Conference on the Theory of Information Retrieval (ICTIR 2017), 2017.
 - PC Member, The 24th ACM International Conference on Information and Knowledge Management (CIKM 2015), 2015.
 - Journal Reviewer, ACM Transactions on Internet Technology (ACM TOIT), 2013.
 - ACM Student Member, **ACM**, Jun. 2013 - Present.
-

Technical Skills

- **Programming**:
 - Proficient: Java, Python, C, SQL
 - Skillful: C++, C#, Matlab, SCOPE, PHP, JSP, Shell Scripting, \LaTeX
 - Experienced: ASP, JavaScript, Qt, Assembly Language
 - **Theory**: Foundation of algorithms, math, NLP, IR, machine learning and data mining.
 - **System**: Linux/Unix, Windows, Mac OS X, MySQL/SQL Server, COSMOS
 - **Tools**: Weka, LibSVM/ SVMlight, Mallet, Numpy&SciPy, Pandas, Scikit-learn, Theano, TensorFlow, Keras, Torch, NLP pipelines (Stanford NLP, OpenNLP), NLTK, LP_solver, CPLEX & many optimization toolkits.
-

Selected Courses

- Information Retrieval, Artificial Intelligence, Machine Learning, Data Mining, Deep Learning, Algorithm Analysis and Design, Advanced Algorithms, Optimization in Computer Science, Introduction to Numerical Computing with Python, Database Design and Implementation, Database System, Data Structure, Operating System, Distributed System, Computer Architecture, Computer Networks, Advanced Software Engineering, Compiler Method, Advanced Mathematics(Calculus), Linear Algebra, Discrete Mathematics, Probability Theory and Statistics.
-

Nature Languages

- **English** (professional), **Chinese** (mother tongue), **Japanese** (elementary).
